I would like to thank Don and Scott Colarusso and the entire staff at All Hand Fire Equipment and Training. The members of the Rahway Fire Department recently completed End User training with the Sterling F4 Personal Safety System. We were extremely satisfied with the entire process. Don and his staff gave us two demonstrations with various members of our staff so we could make an educated decision on the equipment we were going to purchase. The All Hand Fire training staff provided professional and informative classroom and hand on training at their facility in Neptune City for all four of our shifts. I received nothing but positive feedback from my members about the equipment and all of the related training.

As we all know providing training for a group is not always easy. Don from All Hands Fire answered every one of my phone calls and E mails and provide us with not only outstanding equipment but with professional and first rate training.
