Don Colarusso;

We here at Fifth Generation Inc. want to commend your training program for the work at heights that occurred at our facility. Your team of extremely talented colleagues were able to deliver a fantastic training course that enlightened us with today's modern era of rescue at heights. Our staff members were enthralled with the ropes handling section of the course that ultimately led to the building blocks for our emergency response team. Under your watchful eyes, we were able to duplicate real world scenarios in which potential victims were retrieved from various heights. Congratulations on a job well done. Your organization is without doubt knowledgeable, professional, skilled, and took the time to show even the slowest learner their full attention.

Regards;

Fifth Generation Inc.

Safety Team.
